Safeguarding

At MYND Practice, the safety and wellbeing of the people we work with is extremely important to us.

We are committed to safeguarding **children, young people and adults who may be at risk of harm or abuse**. Our clinicians have a responsibility to recognise and respond appropriately to safeguarding concerns in line with relevant legislation, professional standards and safeguarding guidance.

Confidentiality and safeguarding

Information shared with us is treated confidentially. However, there may be circumstances where we need to share information without your consent, for example where we have serious concerns about someone's safety or wellbeing, or where we are legally required to do so.

Where possible and appropriate, we will discuss this with you and explain why information needs to be shared.

If we have a concern

If a safeguarding concern arises during an assessment, we will consider the circumstances carefully and take appropriate action to protect the individual involved. This may include seeking advice from relevant safeguarding professionals or making a referral to appropriate services.

We will always aim to act proportionately, respectfully and in the best interests of the person concerned.

If you have a safeguarding concern about yourself or someone else, please let us know by contacting:

info@myndpractice.com

If someone is in **immediate danger**, please contact **999** or attend your nearest Emergency Department.
